OBJECTIVE

Full-Stack Developer with extensive knowledge of API development, modern front-end technologies, frameworks, and database management with a focus on NoSQL. Highly motivated. I'm looking for a stimulating opportunity to use my web development knowledge in a cutting-edge company, creating cutting-edge solutions that drive corporate growth and solidifying my position as a top professional in the field.

EXPERIENCE

- **MANAO SOFTWARE** Internship – 2022.
 - Developed and optimized backend APIs NoSQL for the Manao Meals project.
 - Collaborated in an Agile development environment, following Scrum methodology.
 - Optimized CRUD operations and database queries to improve system performance.
 - Implemented scheduled tasks using Firebase Cloud Messaging for timely notifications.
 - Created Swagger documentation for streamlined API testing.
 - Implemented token-based authentication for enhanced security and access control.
